

COMP 3350 Project Iteration 0

Group 2(Handy Application)

Vision:

6/7

- Vision summary
- Vision statement
- Does it conform with the interview?

Vision statement reflects the interview and from technical point of view, the requested features are challenging enough I would say. Looking forward for your upcoming iterations. Your success criteria should be measurable, in your case you must measure user preference of your app as compared to yours through various mediums such as survey.

Planning:

6/8

- Big user stories for all iterations
- Detailed user stories for iteration 1
- Does it follow the preferences of the customer based on the interview?

You could add more detailed stories to your 1st iteration plus some preliminary functionalities such as taking basic notes and so on should be done in your first iteration. Please clearly specify the user stories belongs to which iteration. Your detailed stories should reflect your big stories. Detailed stories are breakdown of the big stories plus the total cost allocated for your detailed stories can't exceed their respective big story.

Total:

12/15
